# Welcome to Autumn 2021 with us at Sagaform AB!

The last year has taught us a lot. We've found new ways of meeting, interacting and showing appreciation for friends, colleagues and customers. We now lift our gaze towards the autumn season and hope the personal meeting will also slowly become a part of the mix how we interact with other people. At the same time, we should hold on to our new experiences and hopefully become more effective in our ways of doing business together.

No one really know what it will look like in the future. But one thing is for sure, the will to show appreciation for other people will remain. We continue to develop our offering and you'll find a lot of new products in this catalogue, along with all our classics. Hopefully you'll find just the right product for that special occasion or that special person. Don't hesitate to ask for our help.

We look forward to yet another season together with you!  
Welcome to us and happy sales!

## ABOUT US

# Our offer

A Way of Living creates brands which gives that little extra in every home and at every company. Our prime focus is that you should feel comfortable in your choice of one of our products and hopefully a little pride as well. We let a feeling of joy set the tone when we develop our products and we want you to have the same feeling selecting the product. With us you'll find products with function in focus, classic designs, but also products that stand out and attract attention. Everything to create that personal touch on your selection of a gift.

# Sustainability for the future

It should be easy to make good choices, which is a key part of the development of our sustainability work. At Sagaform AB, we put great emphasis on sustainability in our processes and take responsibility for how our operations affect people and the environment. Of course, we hope that you are satisfied with your purchased products but also with us as a company.

As part of the New Wave Group, we pursue active sustainability work towards a vision of sustainable growth where business solutions are not only financially favorable but also sustainable from a social and environmental perspective.

What makes the biggest difference is how we conduct our everyday business. That is why we are working to integrate sustainability issues into our core business. The work includes, for example, improved working conditions in production countries, progressive chemical work, and streamlining transport and logistics.

Our common main goal with the sustainability work is to create products with the longest life possible, to minimize the product's negative impact on people and the environment during its life cycle. In our work, we take into account all three dimensions of sustainability - social, environmental, and economic.

One of our strengths is that we have our own CSR staff in place in the production countries who work full time on these issues. The work includes, for example, improved working conditions, progressive chemical work, and streamlining transport and logistics.

Through internal controls in combination with independent reviews, we make sure that our products are produced under good social conditions and do not contain any harmful chemicals. Do you want to know more? Please browse our Sustainability folder which you will find on our website under Sustainability. There is an interesting read about all our CSR work through the New Wave Group.

You can also read more about how we work with CSR and sustainability on the parent company's website [www.nwg.se](http://www.nwg.se). There we have gathered all information about important activities, collaborations, and goals for the future.

## Noor & Niki

We would like to say that these are the best cups in the world. No one serves better coffee, nor is there any cup that makes one as happy as just these. Noor is a classic and modern cup in a retro color scale. With its straight shapes combined with oversized details, it becomes both playful and attractive. Espresso cup and coffee cup Niki is classically minimalist. The cup's oversized ear makes it something really special. Niki is a playful mood enhancer that simply gives a better coffee time.

# Coffee & More

Coffee & More is produced by Sagaform in collaboration with designer Margot Barolo. The series design flirts with the direct, playful and straight language of the 70's. The series is available in various parts, patterns and colours and is at its best when everything is mixed. But it should not be underestimated when used individually. All products are dishwasher and microwave safe. This series has several personalities which we love and appreciate. Which one is your favourite?

Designer Margot Barolo was educated at Beckmans and also has a master's degree in ceramics from Konstfack. She has for a long time successfully worked with the Swedish art industry and during recent years also started challenging the picture of the production around this. Margot Barolo's unique design language and her love of ceramics shows in Coffee & More, the dinner service designed for Sagaform. Included in the series are stackable bowls, coffee cups, latte mugs and plates with inspiration from the 70's and its passion for ceramics with straight lines broken off by a multitude of patterns and playfulness. Her design language is tied together in peaceful nuances, high-gloss glazing and ornamented throughout in relief.

Anton Björnsing has his background from the distinguished Carl Malmsten School in Stockholm where he studied furniture design focusing on wood. Before that he explored design and wooden handicraft at the Steneby School. The austere Scandinavian design language runs like a thread through Anton Björnsing's work. He works mostly with oak in combination with stoneware and glass, which gives the products a further dimension of exciting material contrasts.

Playfulness and curiosity characterizes us. Fantasy and realness drives us when we make artistic design functional. Everything about ByOn says desirable and enticing. With this in mind humbleness and personality is something we keep close to heart. Because, it feels quite special to be part of someone's home, to get the opportunity to open up for all kinds of possibilities - and keep them coming ...

ByOn's base assortment is a complete selection of modern interior design with a classic touch. It is always available, making it easy for you to add new products or to complete and match what you already have. We dare to add colours and materials that last but still breathe new thinking. We are attracted to shapes that want to take their rightful space in your home. We also love eye-catching objects to add something extra to your home. For grown-ups or kids we create contemporary and concrete products with lots of individuality for all the rooms in the home, which makes it a fun and functional collection full of anticipation. We build all seasons around what we call "Momentous Tangibles", which basically means meaningful things. Products that for us add something extra to our everyday and which mediate the feeling we call "Bubbles for everyday".

We hope you'll find the presents and gifts you've been looking for but not been able to find elsewhere. Presents which are the icing on the cake and will mean something extra in the eyes of the beholder. We love to surprise, surely you do as well?

## Blackroot

Blackroot is the dinnerware with a bold look and with its raw expression and matt surface it brings character to your table and your dinner parties. In the Blackroot series you will find plates, bowls, mugs, jugs and serving plates. Great to combine with the porcelain series Asparagus.

## Guilia

Our classic porcelain Guilia has a beautiful colour contrast. Deep m lange sea blue on the inside and matt black on the outside. The inside colour may vary, just like the sea itself. In this series you will find plates, cups and bowls.

## Bubbles

In a world of seriousness and conflicts we need to enjoy ourselves more, to appreciate the moment and be surrounded by things which make us feel good. The glass series Bubbles will make us feel that the glass is always full, even if it's half full or empty. An easy way to remind us of our view of life. No matter if juice, wine, water or dessert is served in the glasses they will make us bubble even more – of laughter, conversations or happiness. May all your troubles be bubbles!

## Consciously simple 1,2,3

We believe the small everyday things play the largest role when it comes to conscious choices and these are often the ones which are easy to change. It is the smaller things you can affect and make decisions about several times a week which will make the biggest difference.

Consciousness and simplicity are two words that are often connected. Two words which have also been our keywords when we created Vakinme. We want to make it easy to choose. To help making small simple choices every day to live sustainably and consciously.

To make it easier to make good choices and above all to understand them we have divided everything about Vakinme into three parts.

We start by describing Vakinme's three-part foundation: the Nordic nature, simplicity and consciously & naturally in touch with you. The Vakinme family are products based on three collections with three unique scents: Daggmossa, Björktuva and Åkermyntha, all having their own brand colour: black, grey or white.

All products are also divided into three categories: body, face or home. Everything about Vakinme should be and is as simple as 1,2,3.

## The nordic nature

Our history is important to us, it shapes our way of looking at everything from shape and design to content. Vakinme's inspiration comes from the Nordic nature, in the contrast between darkness and light. Even our values are created there with a protecting hand over forest and land. To minimize the effect of the production on the environment and to make the natural and ecological advantages come true is therefore a matter of course to us. To be able to do this, locally produced items are the only right decision. All our products are made near Gothenburg, on the Swedish west coast. We are really proud of all our products and the ingredients they are made of.

## Simplicity

It's important to us that our concept is easy to understand, to take in and bring forward. Vakinme's products should speak for themselves with their scents, content and unique expression and packaging. Vakinme's family of products is therefore built on only three collections with three unique scents: Daggmossa, Björktuva and Åkermyntha. All three are associated with the brand colours black, grey and white. From this our thoughts around 1,2,3 have been created. Nothing should be harder to understand than that it can be described in three steps.

## Consciously & naturally in touch with you

With Vakinme we have found an inspirational way of expressing the essence of natural Swedish home and body products. By using certified organic raw ingredients, with refreshing and calming scents, blended with respect for nature and environment we hope to create a feeling of well-being and timeless awareness. By doing so, we also believe that the ingredients we need for taking care of our skin already exist in nature.

# VICTORIAN

It's all about scents. Some work in deep silence and some through the flow of life. All with the ability to take us back in time or adding new dimensions to our reality. And this is what Victorian does, creating new dimensions through the mystery of our strongest sense as well as through our eyes by wrapping each individual scent in a stunning form of packaging. With this combination we hope to show not just the unlimited ways of feeling great, but also how to unfold the power of fragrances.

On and off we work with different main collections standing for emotions and shapes we like one way or another. Under these selections you'll find assortments representing their special place in the Victorian universe. The fundamental thought behind this kind of sense-caressing is that we don't want to decide exactly where we stand. That is not important. What is important is that you will always find some favourite fragrances taking you wherever you like to be. If it's totally crazy, upside down, if it's graphical perfection or beautiful and stylish... Doesn't matter. We have them all. Each main collection is therefore a storyteller of its own.

Which one do you prefer?
